(Unaudited - Expressed in Canadian Dollars)

1. Nature and continuance of operations

Capitan Silver Corp. was incorporated on October 30, 2019, under the laws of the Business Corporation Act (British Columbia) as part of a plan of arrangement (the “Plan of Arrangement”) to reorganize Riverside Resources Inc. (“Riverside”). The Company’s head office address is 550 – 800 West Pender Street, Vancouver, British Columbia, Canada V6C 2V6. On August 21, 2020, the Company listed on the TSX Venture Exchange (the “Exchange”) with the symbol CAPT.

The Company’s business activity is the acquisition and exploration of mineral properties in Mexico.

The Company’s ability to continue operations is uncertain and is dependent upon the ability of the Company to obtain necessary financing to meet the Company’s liabilities and commitments as they become payable, acquiring assets or a business, and the ability to generate future profitable production or operations or sufficient proceeds from the disposition thereof. The outcome of these matters cannot be predicted at this time. The consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. The Company incurred a net loss of \$873,190 for the period ended March 31, 2025 and accumulated losses of \$5,628,824 as of March 31, 2025. Management believes that the Company has sufficient working capital to maintain its operations.

There are many external factors that can adversely affect general workforces, economies and financial markets globally such as global health conditions and political conflict in other regions. It is not possible for the Company to predict the duration or magnitude of the adverse results of these factors and its effects on the Company’s business or ability to raise funds.

2. Basis of presentation

These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for financial instruments, which are stated at their fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

3. Statement of compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Accounting Standards (“IAS 34”), “Interim Financial Reporting” using accounting policies consistent with IFRS Accounting Standards as issued by the International Accounting Standards Board (“IASB”) and International Financial Reporting Interpretations Committee (“IFRIC”). 8. Exploration and evaluation assets

The exploration and evaluation assets in which the Company has an interest are located in Mexico. Title to exploration and evaluation asset interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. The Company has investigated title to all of its exploration and evaluation asset interests and, to the best of its knowledge, title to all of its interests is in good standing.

Cruz de Plata, Durango, Mexico

On January 10, 2022 and as amended on March 1, 2022, the Company entered into an option agreement to acquire all outstanding net smelter royalties ("NSR's") on mining claims in the Cruz de Plata Property from Exploraciones del Altiplano ("Altiplano"), a private Mexican exploration company (the "Royalty Purchase"). The fair value of the Company's cash, restricted cash and accounts payable and accrued liabilities approximate carrying value, due to their short-term nature.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2025, the Company had cash of \$3,874,517 (September 30, 2024 - \$568,421) to settle current liabilities of \$186,520 (September 30, 2024 - \$47,459). The Company believes it has sufficient funds to meet its current liabilities as they become due.

Price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold, silver and copper, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to accounts payable and accrued liabilities that are denominated in Mexican pesos.

Sensitivity analysis

The Company operates in Mexico and is exposed to risk from changes in the Mexican peso. A 10% fluctuation in the Mexico peso against the Canadian dollar would affect loss for the period by \$75,996 (September 30, 2024 - \$88,007).

12. Capital management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of exploration and evaluation assets. In the management of capital, the Company includes components of shareholders' equity. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent on external financing to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

The Company is not currently subject to externally imposed capital requirements. There were no change in the Company's approval to capital management.
